My Girl friend Jenniffer Porter who lives at the  
same address as me me and her would  
take Cassidy to baby site her over night so  
her and Chad could go out this was at  
first but then we took her because she had bruises  
on her they said it was because she had fallen  
many more times she came over with more bruises  
on her and we took her because Mandy did  
not want to bring her to day care. ~~that~~  
I and my Girl friend said to each other that  
it was weird that she had bruises on her face  
that looked like she had been grabbed by  
the face we dont know who but we thought had  
done it ~~Cassidy came over~~ Cassidy came  
over and stayed a few more times because  
Mandy was going out to school and  
Chad's sister was coming over so they did not  
want Cassidy to be seen by Chad's sister  
or parents ~~she came over~~ <sup>she</sup> about every time  
she came over she looked like she had bruises  
on her body kind of like hand prints on her face

I will say this ~~the~~ Casidy was Clumsy and not a very active child she was very quiet and did not walk around like you would suspect a little one to do. ~~One time though~~ <sup>she</sup> I would tell you that I told Mandy that the Baby seemed weird and she did not seem to know what she was doing all the time. One time at our house she got in to wind deck's and I assumed she had swallowed some so I tried to get her to spit it out but other than that she was very quiet and kind of studd there up against the wall in less you put her in bed and even then some times she would get out of bed and stand up against the wall I was told by Chad that she would go and get put in the corner if she was bad so we that that she was so us to this and this would happen all the time I would say there was many times that ~~the~~ we should have thought twice about the brasses on her face because my next store neighbor so he face and that that it was bad and Stanley Staly who worked for me said that it look like she was ~~not taken care of~~
